

Exam Practice

Questions 1–10

Example The title of the first class is called 'Movement and light', so the answer is written as 'light'.

1 brushes The question says 'a set of' and this is paraphrased in the recording as 'a range of...in different sizes'.

2 285/ two hundred and eighty-five

Distraction The woman has seen on the website that the cost for one term is \$170, but the manager says that the cost for two terms would be cheaper. The question requires you to write the cost for two terms.

3 Ramdhanie (this can also be written in capitals)

4 bowls The question says 'several' and this is paraphrased in the recording as 'two or three'.

Distraction The woman says she hopes she wouldn't have to produce a vase or anything with a handle, and the manager confirms that this is true.

5 shirt

Distraction neither 'clothes' nor 'sleeves' will fit grammatically into the gap

6 Thursday

Distraction the manager admits that he was wrong when he said 'Wednesday'

7 library

Distraction the woman mentions a post office, but this isn't the kind of building the class will start drawing

8 sandwich The question requires you to identify something that the woman should take to the class and the manager recommends that she 'make a sandwich' and 'bring that along'.

9 Station You should be familiar with this kind of word, so it was not spelt out

10 021 785 6361

Exam Practice

Questions 11–14

11/12 A/E (in any order)

Distraction B: The question concerns what employees need to do when they return to their new office space, but the manager explains that there is no need for employees to 'get their photo done and update their personal details'. He goes on to say that their current pass (=form of ID) will work; C: again, the manager explains that all the files and folders (=boxes of documents) have already been put on employees' desks, so they won't have to move them; D: the manager says he expects that next week might be 'a challenge', but he refers to this in a positive way and does not suggest it will be a problem. The phrase 'to report back' usually means to tell someone, in person, how well or badly an activity went.

13/14 A/C (in any order)

Distraction B: The manager says that insulation will make the office warmer, but this is not the same as a 'heating system'; D: some rooms will be used by teams to work on projects together, but the manager does not say that any rooms or working spaces have been made larger; E: the windows in the office space have increased in size – so there is more light coming into the area. But 'the old type of lights' would be electrical, and there is no mention of whether these have been changed or replaced.

manufacturers are making supplements) but Sam rejects this as the reason for the increase in Australian sales.

28 C

Distraction A: Lucy refers to the Food and Drug Administration agency, but she explains that they do not require proof that vitamins work. Therefore, the supplement industry has no guidelines to follow in this case. B: Lucy mentions that some vitamins are said to improve brain function, but this is the intended purpose of the vitamin, not a possible harmful side effect.

29 B

Distraction A: Lucy refers to 'a simple cold' but she says the Danish researchers found no evidence that vitamins could prevent or treat this. C: Sam mentions 'high doses' (large amounts) but neither he or Lucy suggest that high doses are harmful.

30 C

Distraction A: Sam puts forward the suggestion that people would stop buying vitamin supplements but Lucy rejects this idea (Hardly!) She goes on to explain why stricter regulations wouldn't make a difference to consumer's beliefs that vitamin supplements are worth taking. B: Lucy mentions 'fish oil with vitamin D' – but does not say that this product in particular should be regulated.

27 A

Distraction B: Lucy mentions that fitness-related articles *recommend* (similar to 'advise') vitamins – but a health authority is a government organisation. We are not told who the authors of the articles may be. C: Lucy certainly expresses the idea in C (the price has dropped...so many

Exam Practice

Questions 31–40

31 **gardens** The idea of 'important plants are no longer found in' is paraphrased in '...gardens ...don't always contain the kind of plant that insects need.'

32 **climate change** In the recording, the 'cause of' butterfly and beetle loss is changed to 'They

[=scientists] put this down to climate change'. [Both words are necessary]

Distraction 'fragmentation of habitat' is also mentioned, but scientists do not believe this is a cause. The phrase is also 3 words, and only two words can be written in each gap.

- 33 memory** We are told that pesticide impacts on [=affects] a bee's memory. This is further explained as 'This means that they cannot remember how to get back to their hive.'
- 34 food chain** 'An essential part of' becomes 'at the bottom of the food chain... They're [=insects are] absolutely vital' [Both words are necessary]
- 35 medicine** In the recording, the idea of research based on plants is expressed as 'scientists are now studying plants to find out whether they might be a source of medicine'.
- 36 meat** The answer can be found in 'If we cut down on [=reduced] how much meat we ate [=consumed]...'
- 37 bricks** We are told that 'they [=builders/housing developers] removed tons and tons of the sand and turned it [=the sand] into bricks'.
- 38 eggs** The speaker explains that that the metalmark butterfly lays its eggs on the buckwheat plant, and on no other.
- 39 fire** In the recording 'wildlife' is explained as 'butterflies and plants' and we are told that fire has destroyed a significant number of them [= it has led to their loss].
- 40 conservation** The speaker explains that while some projects involving conservation need a lot of land, others do not. In the case of the metalmark butterfly, it only needed the area of the dunes to survive.

READING PASSAGE 1

Exam Practice

Questions 1–6

- 1 **TRUE:** According to Dr Richter, ‘in the very first years of life, we form emotional connections with lifeless objects such as soft toys’ and these relationships ‘are the starting point for our fascination with collecting objects’.
- 2 **TRUE:** The text states that, ‘Only by collecting sufficient food supplies . . . could our ancestors stay alive. . .’
- 3 **FALSE:** The text states that Woolley’s plan when he travelled to Ur was ‘only to excavate the site of a palace’. However, ‘to his astonishment’ he found an old museum instead.
- 4 **TRUE:** The text states that accompanying some of the artefacts, Woolley found ‘descriptions like modern-day labels’. These are referred to as ‘texts’, i.e. ‘writing’.
- 5 **NOT GIVEN:** The text states that ‘very little else is known about Princess Ennigaldi or what her motivations were for setting up her collection’. Her motivations are not known, hence Not given is correct.
- 6 **FALSE:** The text states that Cabinets of Curiosities ‘typically included fine paintings and drawings’. However, ‘equal importance was given to exhibits from the natural world’.

Questions 7–13

- 7 **banking** ‘politics’ and the idea of a ‘royal house’ might be tempting, but the source of the family’s wealth was ‘banking’.
- 8 **windows** ‘walls’ might be tempting but doesn’t make sense in this context, but ‘windows’ makes sense in terms of making the valuable collection safe and secure.
- 9 **illustration** ‘birds of paradise’ provides distraction here but the text about proving other researchers wrong does not make sense in this space because they were Worm’s contemporaries. Only the ‘illustration’ of the great auk was of value to later scientists.
- 10 **pottery** She translated ‘books’ but did not collect them. Only her ‘pottery’ was left to a museum.
- 11 **lectures** The text does not say what happened to Mayer’s collection after he died. But his legacy was the public ‘lectures’ that he funded.
- 12 **fossils** She donated most of her other collections to a museum, but not her ‘fossils’.
- 13 **stress** The phrase ‘model ships, coins and artworks’ provides distraction, but none of these objects were relevant to his job as president.

READING PASSAGE 2

Exam Practice

Questions 14–19

14 Paragraph A iv

- The headings refer to a ‘number of criticisms’. Three criticisms are identified in paragraph A: Dr Fischer’s; the fact that no-one could agree on a definition; and the ethics of filming without consent. These criticisms apply to all documentaries in the 20th century.

- Criticisms of documentaries are mentioned/ implied in other paragraphs (e.g. C discusses the Direct Cinema movement, which rejected Grierson's approach) but this does not apply to all films, only one type.

15 Paragraph B vii

- When the first documentary was produced is 'open to question' – hence there is a 'debate'. One idea is that *Nanook of the North* (1922) was first; however, a group represented by Anthony Berwick suggests documentaries can be traced back to 1895.
- Paragraph C also mentions a debate about documentaries, but this does not refer to their origins, but rather to how to make them.

16 Paragraph C i

- Two approaches to filmmaking are contrasted in C. The group typified by John Grierson used tripods and sometimes staged scenes by asking subjects to repeat actions. On the other hand, the Direct Cinema movement rejected this approach and preferred more natural films. They used hand-held cameras and did not rehearse subjects.
- Both these approaches are 'historic' – in the past.
- As a distraction, the word 'however' appears in the middle of paragraph B. But the two types of film here are described as 'similar'; the approach to filmmaking is not being contrasted, only the dates when the films were made.

17 Paragraph D viii

- Paragraph D outlines how new technologies have made it possible for 'anyone/amateurs' to become filmmakers.
- Paragraph F provides distraction, but F is talking about 'promoting' films, not 'creating' them.

18 Paragraph E v

- The focus here is on 'one film' (*Catfish*). Films are named in many other paragraphs as distraction, but none of them are said to represent the 'fresh approach' that is outlined in the whole paragraph.
- The idea of a 'fresh approach' is common in E: 'new generation', 'new philosophy', 'new trend', 'new realisation', etc.

19 Paragraph F iii

- A wide range of opportunities need to be mentioned; paragraph F names four festivals and refers to many others.
- Paragraph D provides distraction, but D is about making films, whereas F is about promoting them.

- ii provides distraction. Different approaches to filmmaking by groups is mentioned, but not two individuals.

- vi provides distraction. None of the paragraphs outline possible future trends.

Questions 20–23

20 D

Compare with Maria Fiala quote in paragraph D:

The creation of some new technologies = these innovations change viewers' attitudes = transformed what the public expected to see did not = isn't entirely accurate

21 C

Compare with Paula Murphy's reported speech in paragraph C:

beliefs and techniques = principles and methods helped to make documentary films = brought documentaries to the attention of academically respectable = university and film historians; serious scholarly analysis

22 A

Compare with Dr Helmut Fischer quote in paragraph A:

putting material on film = record an incident on camera changes the nature of the original material = altering its reality essentially = fundamental way

23 E

Compare with Josh Camberwell's quote and reported speech in paragraph E:

have an obligation = it is a requirement include their own opinions about and analysis of = express a particular viewpoint and give personal responses to the real events that they show = the material they are recording

Questions 24–26

The title of the summary and the first sentence of the summary locate the information clearly in paragraph F of the passage.

- 24 three minutes / 3 minutes: the locator words = Hamburg Short Film Festival, and 'category' no more than three minutes long = may not exceed three minutes in duration

- 25 first timers / 1st timers: the locator words = Short and Sweet Film Festival especially good = this is the ideal venue to

- 26 animations: the locator words = Atlanta Shortsfest numerous forms of documentaries = established types of documentaries which are becoming more common = the growing popularity of

READING PASSAGE 3

does not say whether jellyfish are **moving** from shallow to deep water, only that they live in both environments.

- 30 NO:** Paragraph 2. Dr Hansen's theory has been 'conclusively proven by independent studies'.
- 31 NOT GIVEN:** Paragraph 3. The point the writer is making is that climate change may, or may not, be responsible for increasing jellyfish populations – more research is necessary to find out. The writer makes no comment about whether the consequences of climate change can be reversed.
- 32 YES:** Paragraph 3. Previously, some scientists thought jellyfish had no predators. Paul Dewar has shown that this is wrong. As a result, 'the scientific community now recognises that' various species eat jellyfish. Therefore, Dewar's findings have been accepted.

Questions 33–36

33 B

In the 4th paragraph, the writer dismisses three common myths about jellyfish: they **do** have senses and are complex; they **can** sleep; and they **are** good swimmers. Therefore, B is correct.

A is wrong because only one type of jellyfish is named.

C is wrong because theories are not being **contrasted**; in fact, the theories mentioned about jellyfish are all similar in that they were false.

D is wrong because the myths about jellyfish have been corrected **because of** scientific research.

34 A

The writer lists several ways jellyfish cause **harm** to humans: their sting; blooms; breaking fishing nets; overwhelming fish farms, etc. The writer then outlines the ways jellyfish **help** humans: as a source of collagen; by providing a useful protein, etc. The writer **concludes** in the final sentence that there are 'conflicting factors' in the relationship between humans and jellyfish – some positive and some negative. Therefore, A is the correct answer.

B is wrong because in this paragraph the negative impact is the other way around: jellyfish harm humans.

C is wrong because these problems are in the **present**.

D is wrong as no **similarities** are listed.

35 C

The paragraph outlines various ways that jellyfish have managed to survive, despite difficult conditions, and research showing that one type of jellyfish can become

Exam Practice

Questions 27–32

- 27 NO:** Paragraph 1. The writer says that most people may only have seen a dead, shapeless jellyfish on the beach, or perhaps been stung by one, 'so it is inevitable' if people have negative views of jellyfish. inevitable = not surprising
- 28 YES:** Paragraph 1. The writer says that 'disappointingly little' research was carried out into jellyfish and that marine biologists 'took the easy option' by focusing on other species. Therefore, they 'should have conducted' more research.
- 29 NOT GIVEN:** Paragraph 2. There are clear locators here: 'shallow' and 'deep' water. But the writer

younger. In the final sentence the writer sums up by commenting that jellyfish are 'resilient' – able to cope or survive in difficult conditions. Therefore, C is the correct answer.

A is wrong because while the 'planet' is mentioned, there is no reference to 'dry land'.

B is wrong because although jellyfish seem to do well in acidic water, they don't 'improve' their environment.

D is wrong as there is no reference to jellyfish harming other species, just doing better than some in difficult conditions.

36 B

The writer outlines the lifecycle of the scyphozoa in this paragraph. The lifecycle is 'biologically complex' because the jellyfish goes through three quite different stages of life. The scyphozoa 'illustrates' something common to all jellyfish because they all go through similar life stages. This complexity is emphasised in the final sentence – 'sophisticated and unusual'.

A is wrong as the paragraph is talking about 'complexity', not 'size'.

C is wrong because complexity does not imply that jellyfish are threatened.

D is wrong because scientists **do** now understand the three life stages of the scyphozoa.

Questions 37–40

37 C

1st paragraph. We are told that during the 20th century, massive nets and mechanical winches often damaged jellyfish specimens. But now in Norway and the Arctic scientists have 'discovered that sound bounces harmlessly off jellyfish' and for this reason scientists 'are using sonar to monitor jellyfish'.

38 E

2nd paragraph. 'numerous additional species of jellyfish unknown to science only a few years ago' = there are more types of jellyfish than previously realised

39 A

4th paragraph. 'they shut down their bodies and rest in much the same way that humans do at night' = it was wrong to assume that jellyfish do not sleep

40 D

6th paragraph. 'certain jellyfish are able to revert to an earlier physical state, leading to the assertion that they are immortal' = it has been claimed that one particular type of jellyfish may be able to live forever

WRITING TASK 1

Exam Practice

Sample answer

The two plans show that there were a number of small but important changes to the ground floor of a museum between 1990 and 2010. The general design remained the same, with the entrance and stairs in the same place, although the entrance was widened and certain areas were used for different purposes. The most noticeable alteration was the removal of the Archaeology Gallery. This was replaced with two new areas: a poster display space and a children's interactive zone. The Natural History and Local History rooms stayed the same size and in the same location, but one wall of the latter was knocked down, making it more open. The museum office was unchanged but the reception counter was enlarged and moved closer to the entrance. The original gift shop was expanded to include a café. The statue which in 1990 was next to the staircase was moved to the centre of the floor. A lift was added in the space between the Gift Shop and the Natural History Room.

Exam Practice

Sample answer

It is clear that large numbers of people spend a considerable proportion of their leisure time looking at their smart phones or similar gadgets. In my view there are two major reasons for this. Firstly, so much of our lives is now managed through these devices and we are expected to be in touch at all times. It is no longer acceptable to say that we are on holiday and cut off from communication with the outside world. A related but separate point is that it is difficult to conduct our social lives without a mobile device. People travel much more and their friends often live far away. Therefore, they actually need to conduct relationships online rather than face to face and for this reason frequent use of a mobile device is considered essential.

There are some worrying aspects to this growth in the use of mobile devices, especially at times when people are supposed to be relaxing. Firstly, it is widely believed that phone use can become addictive and lead to an

unhealthy dependence. People can become anxious if they do not check their devices at all times of the day and night and this can cause insomnia and other kinds of mental health problems.

On the other hand, such devices can provide great sources of information and entertainment during our free time. It is, for example, valuable to have a mobile device when travelling in a new area, to look up routes or to find interesting places to visit. They also greatly facilitate activities such as making arrangements to meet up with friends.

On balance, I feel that rather than spoiling our health or reducing enjoyment of our free time these devices actually enhance our lives.

SPEAKING PART 1

Training

Useful language: extending your answers

1 Answers will vary

2 Possible answers

- 1 I use a computer every day because I need it for my work and I like to keep in touch with friends on social media.
- 2 I learned to use a computer at school when I was six. We did some exercises on it as well as playing games.
- 3 I like watching action films rather than romantic films, although some action films are too violent.
- 4 I'd like to go to the cinema more often but I have a lot of homework.
- 5 I don't like watching sport unless there is an international football match.
- 6 I'd like to try ice-skating but I am scared of falling over.
